EDUCATION

2022 - 2026

JIST, JORHAT, ASSAM

- BTech in Electronics Engineering
- CGPA: 8.0 / 10.0

2020 - 2021

VKV, TINSUKIA, ASSAM

- 12th Grade
- Percentage: 84 / 100 %

SKILLS

- Graphic Design
- Power BI
- Data Analysis
- Time Management
- Leadership
- Effective Communication
- Python Programming
- Critical Thinking

LANGUAGES

- English (Fluent)
- Bengali (Expert)
- Hindi (Expert)

PROFILE

A dedicated college student and freelancer specializing in Python coding, graphic design, and data entry, I have a proven track record of delivering exceptional results. Proficient in Canva for design and Excel for data management, I am passionate about Cloud Computing, Data Science, and Power BI. I have built a strong Freelancer.com profile and launched a technology-focused portfolio website to attract new opportunities, committed to using my skills to advance a company's mission.

WORK EXPERIENCE

Freelancer

2023 - PRESENT

Graphic Design, Data Analysis, Python

- Freelance professional working on various online platforms, including Freelancer.com.
- Specializes in Python coding, graphic design (Canva), and data analysis (MS Excel).
- Delivers quality projects on time to clients globally, ensuring client satisfaction in technical and creative fields.

Student

2022 - 2026

JIST, Jorhat

- Created and developed a mobile application for a school-wide event that enabled farmers to easily identify various potato diseases by examining the leaves. This app allows them to effectively differentiate between late blight, early blight, and healthy plants.

Summer Internship

2024

Student Intern

- I developed a predictive model for real-time car prices and integrated it into a user-friendly website. This allows users to easily input car details, which the model then uses to provide estimated selling prices based on current market values. The aim is to assist users in making informed purchasing decisions.

HOBBIES

Outdoor games like football and cricket. A big fan of FC Barcelona

CERTIFICATIONS AND LICENSES

Infosys Certified: Python for Data Science

- Utilize NumPy arrays and matrices to treat images as matrices.
- Solve complex linear systems and linear algebra problems.
- Analyze statistical outcomes of real datasets and perform feature engineering.
- Visualize datasets in 2D/3D and enhance their appeal.
- Apply various machine learning algorithms for predictive analysis.

Microsoft Certified: Power BI Data Analysts Associate

- The certification covers essential skills and knowledge for Data Analysts.
- It includes basic Power BI terminology.
- Explains how Power BI services and applications collaborate.
- Demonstrates how Power BI can enhance business efficiency.
- Teaches how to create engaging visuals and reports.

AWS Cloud Practitioner Essentials

The AWS Cloud Practitioner Essentials course provides a basic understanding of Amazon Web Services (AWS).

Objectives:

- Understand AWS infrastructure and benefits.
- Differentiate cloud deployment types.
- Identify solutions and cost management.

Intended Audience:

- Professionals in various fields and AWS Academy students.

Prerequisite

- Basic IT knowledge.

Get Started Building with Power BI

- The Get Started with Power BI course enhances data analytics skills through insights into data modeling and transformation techniques, emphasizing hands-on practice with real-world scenarios.
- Participants learn to integrate diverse data sources and create dynamic dashboards, promoting collaboration and a data-driven culture within organizations.
- The course also provides problem-solving strategies and access to a community of data professionals, supporting continuous learning and career advancement in data analytics.
